Progress through efficiency

The full-service solution from CADstar enables all CAD/CAM services to be outsourced — for greater comfort, performance and returns.

CADstar is the largest manufacturer-independent competence centre for digital dental technology in Austria. For more than 10 years, we have been known for providing a sustainable division of labour to lessen the burden on dental laboratories and achieve optimum strategic positioning. Our formula for success: we combine the high-performance equipment of major industries with the know-how of experienced dental experts.

By collaborating with us, laboratories keep their infrastructure up-to-date and automatically benefit from a workflow that has been meticulously developed without contractual obligations, expenditure or risk.

This is ensured by extensive warranty services, customer-oriented support and a quality standard certified according to ISO EN 13485. The result: with CADstar, your laboratory will automatically evolve alongside technical progress and will always be able to operate as profitably as possible.

Benefit from customised CAD/CAM full services developed by dental technicians for dental technicians and learn more about us.

It's worth it.

EASY
EXCELLENCE

3D-SCANNERS

PROSTHETIC PARTS
ORTHODONTICS

Excellence couldn't be easier.

With CADstar, you can quickly and conveniently optimise your workflow.

The CADstar principle is both efficient and extremely convenient:

- Central interface = convenient order management
- Completely digitalised workflow = fast, secure processing
- ISO-certified quality management = consistent, high-quality performance
- Owner-managed company structure = personal, unbureaucratic support
- Complete production in Austria = short distances, high quality
- Unique warranty services = no risk

We take responsibility

for our services

As an Austrian company with an 'Easy Excellence' claim, CADstar is based on outstanding quality and convenient service.

How we provide optimum care for our customers and partners:

- 5-year guarantee on CADstar products made of zirconium dioxide
- Free dental advice
- Free shipping materials
- Invoice with 30-day payment period or direct debit with 3% discount
- Affordable financing of equipment

Looking for that something extra?

We make sure that you are able to work smoothly and grow comfortably with technological progress. Our technical support includes:

- Setup of a CAD workstation
- Regular updates
- Free remote maintenance
- Hotline Germany +49 (0) 800 32880 10 | Austria +43 (0) 6462 32 880
- Regular training with the CADstar Academy

101 percent here for you.

We fully believe in our service. This can be seen in our comprehensive warranty services:

- 2-year manufacturer's guarantee on CADstar scanner
- 5-year warranty on material defects
- In addition, we oversee the entire ordering process – from personal advice and order acceptance to production and delivery.

staraligner
DIE UNSICHTBARE LÖSUNG

Invisible tooth correction

What is Staraligner™?

Staraligner™ is a system for invisible corrections to the position of teeth using a sequence of transparent splints, which gradually move the teeth to the desired position.

Correct teeth effectively with staraligner™.

Staraligner™ is a complex, intelligent splint system that guarantees gentle, painless and effective correction of tooth misalignments. Each tooth misalignment is defined by certain deviations from the so-called ideal tooth arch, e.g. rotations, inclinations, overcrowding or gaps. In most cases, there is a combination of several different types of deviation.

The benefits for you at a glance

invisible &
ultra thin

perfect fit

Prices per patient case

If you usually only handle individual cases, then use the staraligner™ package deals.

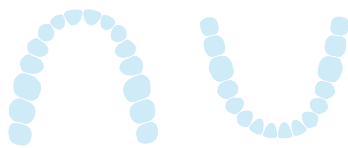

Treatment A €590.00

Treatment of one or two complete jaws with max. 3 sub-setups.

including initial assessment
including design
including 3 sub-setups
including all alignment splints

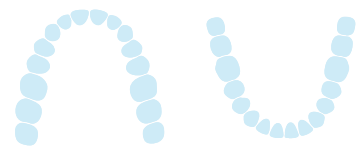

Treatment B €990.00

Treatment of one or two complete jaws with max. 6 sub-setups.

including initial assessment
including design
including 6 sub-setups
including all alignment splints

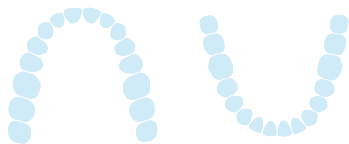

Treatment C €1,290.00

Treatment of one or two complete jaws with max. 10 sub-setups.

including initial assessment
including design
including 10 sub-setups
including all alignment splints

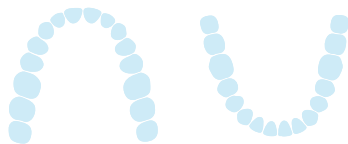

Treatment D €1,590.00

Treatment of one or two complete jaws with max. 14 sub-setups.

including initial assessment
including design
including 14 sub-setups
including all alignment splints

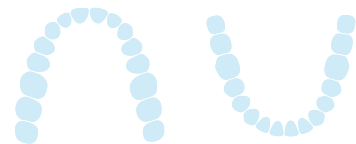

Treatment E €1,890.00

Treatment of one or two complete jaws with max. 18 sub-setups.

including initial assessment
including design
including 18 sub-setups
including all alignment splints

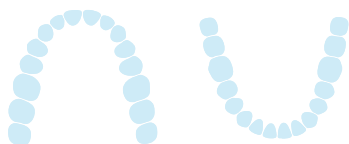

Treatment F €2,190.00

Treatment of one or two complete jaws with max. 22 sub-setups.

including initial assessment
including design
including 22 sub-setups
including all alignment splints

Treatment G €2,490.00

Treatment of one or two complete jaws with max. 26 sub-setups.

€129 for each additional sub-setup

including initial assessment
including design
including 26 sub-setups
including all alignment splints

Important

No reimbursement in case of discontinuation of treatment.

After creation of the design, a cancellation fee of €169 shall apply.

A charge of €169 shall apply to interim impressions and new designs.

Delivery times

- Design appraisal -> 2 working days
- Definitive case design -> 5 working days
- Production -> 7 working days

MILLING

Nothing is impossible

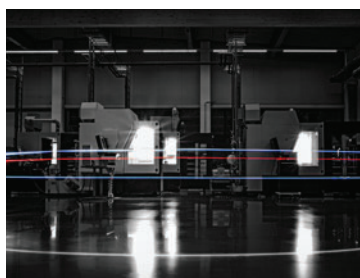

The CADstar milling centre works with state-of-the-art CAD/CAM technologies and exclusively premium dental raw materials.

Thanks to the extensive know-how of our dental technicians, this is a perfect combination to guarantee excellent accuracy of fit and aesthetics irrespective of the requirement, material and manufacturer. This applies to both compulsory and optional items. If necessary, we also oversee the entire frame technology and finishing. CADstar manufactures everything from single caps to 16-unit bridges. We also produce abutments from all leading manufacturers, tertiary structures for telescopic and conical work, free-end bridges with support and Schröder distal pin attachments (primary copings). We work with zirconium dioxide, cobalt chromium, titanium and glass ceramics as well as PMMA, Peek (BioHPP) and composite materials.

In-house production of the scanner components with a production depth of over 90%.

High-end machinery and highly trained employees make all the difference.

Years of dental experience are directly incorporated into CADstar's innovations.

Zirconium dioxide

Indications

Frame	Frame	Bridge/frame	Bridge	Abutment	Telescopic
anterior / posterior tooth	occlusally screwed	occlusally screwed	< 16 units	2-piece	primary

Products

	STL	Model
Frame / fully anatomical crown (per unit) <small>Item number: 50015</small>	€25.90 2 working days	€41.90 3 working days
Occlusally screwed abutment cap (per unit) plus titanium base * <small>Item number: 50000 Pontic: STL plus €23.90 per unit / Model plus €38.90 per unit</small>	€37.90 2 working days	€53.90 3 working days
Adhesive abutment cap (per unit plus price for titanium bonding base see p.31) <small>Item number: 50000-VK</small>	€49.90 2 working days	€65.90 3 working days

* for multi-unit bridges, the production time is extended by 1 working day

Material colours

CS00: white

CS01: approximately corresponds to VITA colours A1 and B1

PROSTHETICS

Equally worthy and fully compatible

CADstar prosthetic components

Prosthetic components from CADstar are the perfect alternative to expensive original prosthetics. The quality and reliability of the parts produced by CADstar are tested and certified by independent institutes. The range includes titanium bonding bases, abutment screws, laboratory implants and scan abutments that are compatible with the leading implant manufacturers.

CADstar thinks ahead

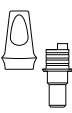

The future of implant prosthetics

With the Starbutment developed by CADstar, individual titanium abutments can also be ordered analogously for the first time: significantly higher quality, cheaper and less time-consuming than catalogue products!
