EASY
EXCELLENCE

3D-SCANNERS
MILLING
PROSTHETIC PARTS
ORTHODONTICS

The future is on its way

—
and close enough to touch

www.cadstar.dental

 **CAD**star

CS.Nova / CS.Nova^{Pro}

Let yourself
be inspired
from a
completely
new level
of precision,
comfort and
efficiency.

The logical next step
in intraoral scanning is
here. Finally!

Interactive Live-View Touch Display

This display is not just for playing.

-  **Intraoral Camera***
-  **Live Scan-View**
-  **Case Switch***
-  **Remote Control**

See the scan in real time on the display, pause it at any moment, and rotate the model directly on the touch screen.

* only for CS.Nova^{Pro}

Optical Status Indicator

**You
CAN**
touch this!

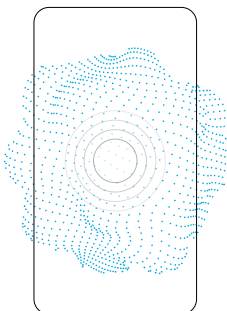

Leave your

on during the scan!

The touch display will still work.

SUPER TOUCH

**Smart tech
inside**

Thanks to its powerful quad-core chip,
the touch display responds with
smartphone-like speed and fluidity.

Processor: Quad-Core-Chip
Framerate: up to 150 FPS
Resolution: 96DPI

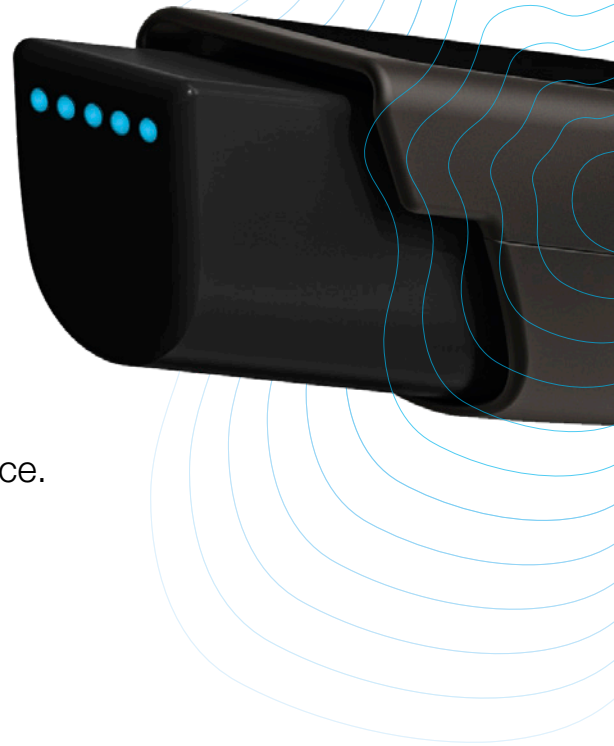

**We don't want
to show off,
but OMG is
this thing fast!**

Booting up your smart phone
takes longer than scanning
upper and lower jaw!

**Love is
in the air.**

You will love the feeling of scanning freely,
especially if you've felt chained to your wired device.

Let us unchain you!

Technical support

Free of charge

Free from annoying license fees & service contracts

OSI - Optical Status Indicator

Device status

Displays current workstate and project assignment

Manufacturing

Made in Austria

> 90% of components from Europe

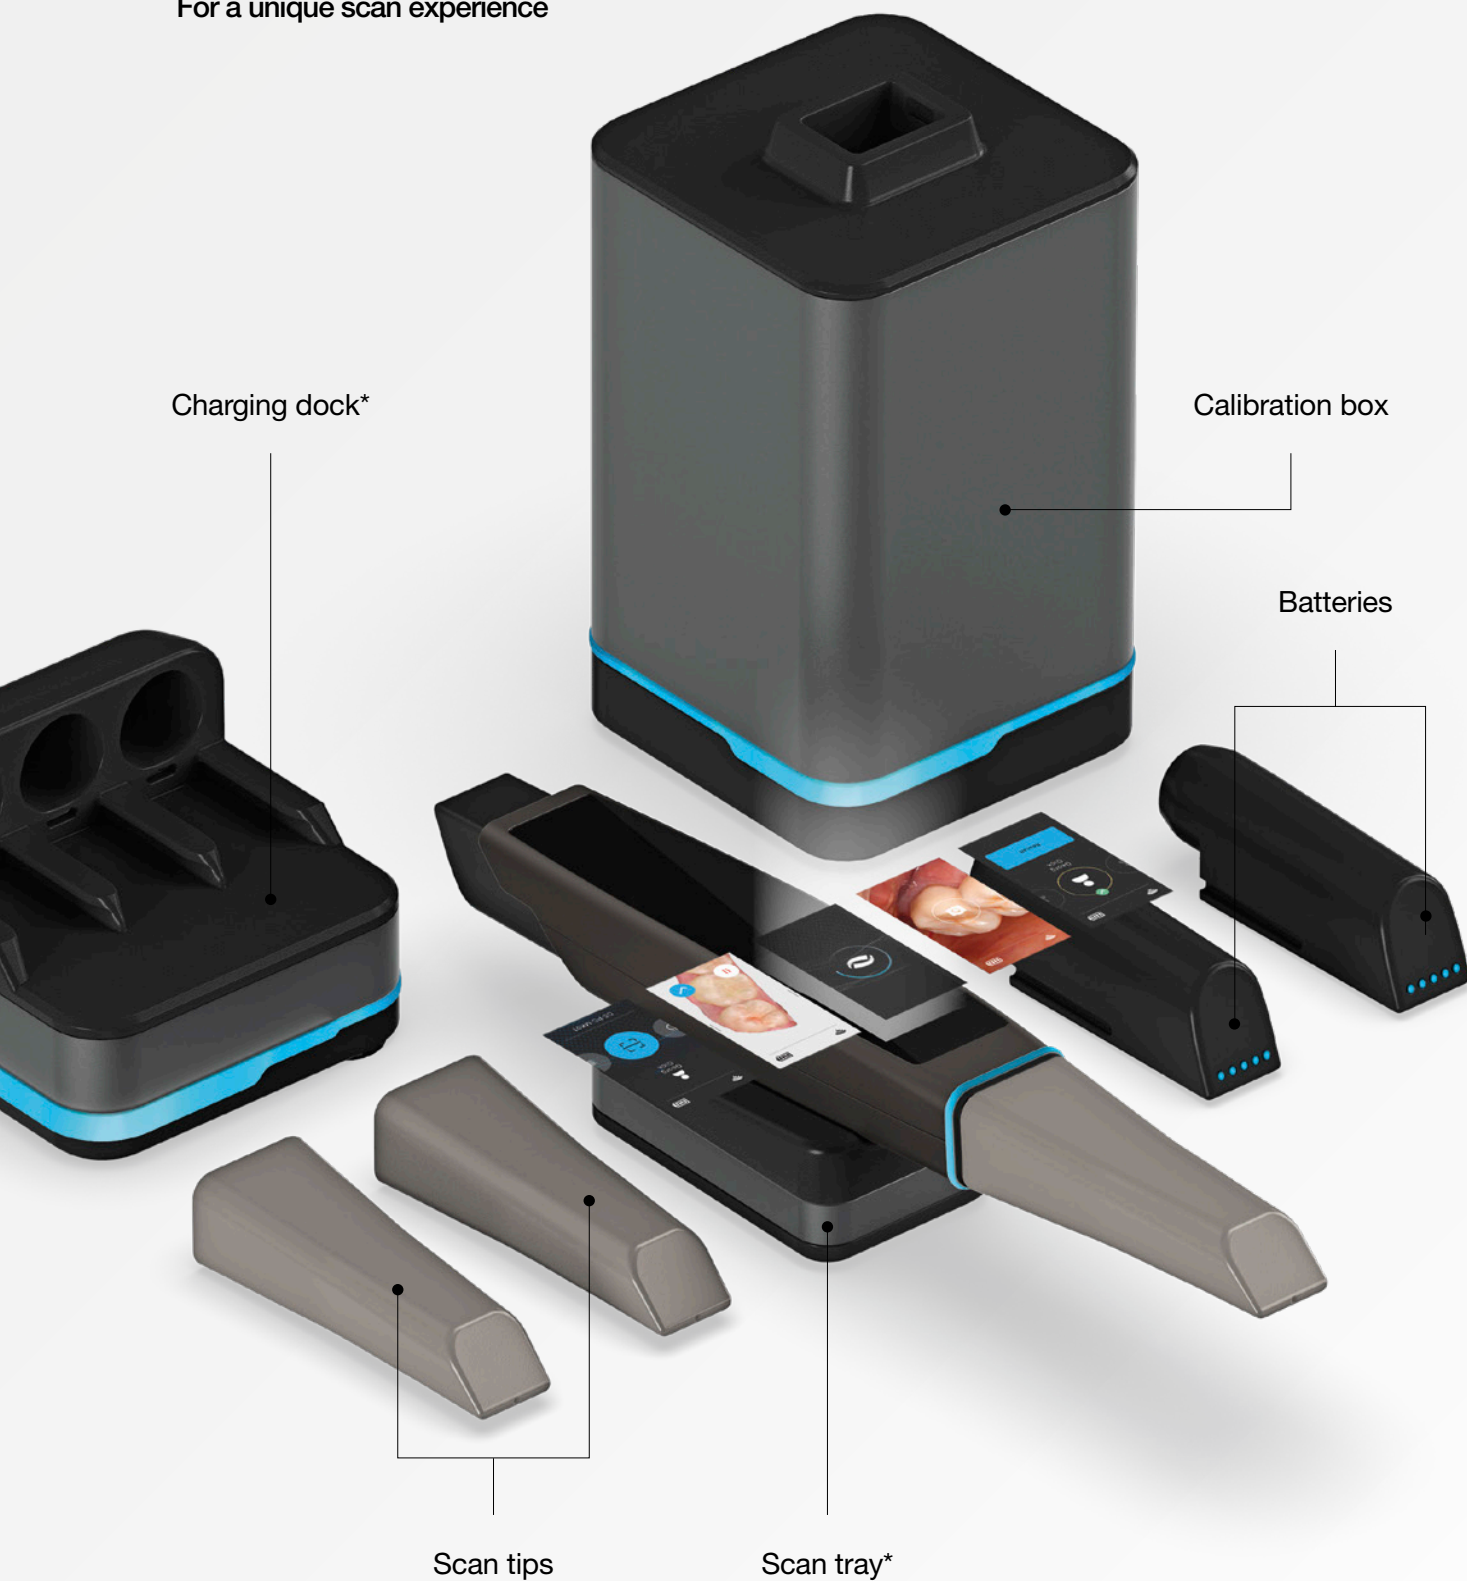

100% compatibility with exocad

Open system

Export data: STL, PLY

Accessories

For a unique scan experience

Basic equipment

1x Intraoral scanner
1x Calibration box
1x Battery
2x Scan tips

* PRO accessory upgrade

+2x Batteries
+2x Scan tips
+1x Scan tray
+1x Charging dock

Technical accessories (included)

1x WiFi dongle
1x USB-C cable
1x USB-C charger
1x USB-C adapter

DEEP VIEW

For those who really want to be precise.

Deep View is a triple-cam scanning technique to have a deeper look into interdental areas.

* enormous focus range

QUICK SHIFT

Sounds like a dance but it's a feature.

The 180° rotatable scan tips make it possible to achieve precise results for each patient.

* 100x autoclavable

TIP DETECTION

Scan, switch, scan - nothing more.

Thanks to the automatic tip recognition handling the scanner is more comfortable than ever before.

* 3 different tip sizes (S, M, L)

MULTI PAIRING

One for all and all for one.

Easily connect the scanner to various devices and software solutions for maximum flexibility.

* multiple scanners with one application

Connection type: Wireless
Scan output: Color
Housing material: Aluminum

Length: 265 mm
Width: 37 mm
Height: 34 mm

Weight scanner: 220 g
Weight battery: 60 g
Weight tip: 10 g

Battery runtime: 1 h
Battery stand-by: 8 h
Cases/runtime: 60x
